Hi Niles,

I just talked to Kevin Pierard and he agrees that the language Bruno proposes is correct. Please change the PPA to state

U.S. EPA R5 will review NPDES discharge permits greater than 5 million gallons per day (MGD) in the Lake Michigan basin and NPDES discharge permits greater than 1million gallons

per day (MGD) that directly discharge to Lake Michigan.

Allen Melcer

Chief, Program Services Branch

U.S. EPA, Region 5

So Niles, can you please insert the language I suggested in my email and send out? Here is the language:

U.S. EPA R5 will review NPDES discharge permits greater than 5 million gallons per day (MGD) in the Lake Michigan basin and NPDES discharge permits greater than 1million gallons per day (MGD) that directly discharge to Lake Michigan.

There is this language in case one of real concern pops up: IDEM and U.S. EPA R5 will evaluate the list annually (e.g. FY15 midterm adjustment) to identify additional permits for U.S. EPA R5 to review based on national and regional priorities and/or permits to remove from the list (speaking of removing, I hope the coal GP was removed).

I'm sorry to pick at this one, but I think it means a great deal to us. Can we please change it and call this finished?

Tinka, Bob, Alan and Niles-

I just saw the language on the permit review and do not think it captures what Martha had negotiated. We want it to say the following:

U.S. EPA R5 will review NPDES discharge permits greater than 5 million gallons per day (MGD) in the Lake Michigan basin and NPDES discharge permits greater than 1million gallons per day (MGD) that directly discharge to Lake Michigan.

Please find attached the revised copy of the 2015-2017 Performance Partnership Agreement (PPA) between the IN Department of Environmental Management (IDEM) and the U.S. Environmental Protection Agency Region 5 (U.S. EPA R5).

Please let us know if further information is needed. Thank you.
